I was told this story by my classmate. It happened not long ago during her participating in the ~~At-Russian~~ olympiad in Biology. Frankly speaking, Ann is ~~very~~ amazed <sup>about</sup> in studying sciences - Biology, Chemistry and Physics have become her favourite subjects since the very beginning. Interestingly, not only she is ~~interested in~~ eager to study theory, but also carry out laboratory works, to see by her own eyes how the chemical reactions occur - for her this experience is terrific. Hence, you can now probably understand how willing she is to acquire novel knowledge and continue her studies in a Higher Institution.

This case has happened just recently - about 4/5 months ago. To cut a long story short, I will just say that she spent all her spare time ~~on~~ learning even the most tiny aspects

of biological processes. Finally, the day-x ~~had~~ came and it was time to see whether all her sleepless nights were in vain or the luck would help her to win. Unsurprisingly, the tasks were tough, by and large, but she didn't give up and remembered that her aim was to become a winner and get an opportunity to enter her dream University without passing any additional exams. Actually, she had been fulfilling the tasks up to <sup>the</sup> very end, ~~but she managed to do this successfully. Ann got enough points to become a prize winner. I won't keep as a secret how happy she was.~~ <sup>she didn't use any cheat sheets</sup>

Finally, you will ask me – so what, is that all?  
And I will reply – a few days ~~had~~ passed and Ann was informed that the victory in this Olympiad this year ~~doesn't~~ <sup>didn't</sup> give a chance to enter the University – you still have to pass all the exams.
