This refreshing origins story, starring Nicholas Hoult, the early life of JRR Tolkien. A sweet innocence and high-mindedness pervade this movie about the early life of Tolkien – who, like (best know for *The Chronicles of Narnia*), became a successful author but remained an unworldly Oxford to the end of his days. Nicholas Hoult plays the doe-eyed young author with a brilliant for languages who makes three good friends and falls in love.

The story is told via from his soldier's existence, worrying about his schoolroom comrades and agonising over the love he might have lost.

I very much enjoyed the young Tolkien's prewar ecstatic conversion the world of philology at Oxford, with one of the sharp-tongued professors telling him to write a 5,000-word essay on the Norse influence on *Sir Gawain and the Green Knight* before teatime.

We know that J.R.R. Tolkien was educated at Oxford where he grew to enjoy the pleasures of University life, though his income made it difficult to keep up with the spending habits of more affluent students. A lot of his time was spent researching other languages in the .

It was sometime after 1930 that Tolkien an unexpected inspiration to start writing *The Hobbit*. In the course of time, the publishers got a copy but due to the sheer scope and length of the book were of publication. There are various moments that are supposed to be goosebump-inducing of Tolkien's future created world of dragons in the midst of the western front carnage. But the film, understandably perhaps, can't his romantic and mythic vision of battle with the banal horror of the first world war.
